Picture of the Heart - WebMD The heart is a muscular organ about the size of a fist, located just behind and slightly left of the breastbone. The heart pumps blood through the network of arteries and veins called the cardiovascular system. The heart has four chambers: The right atrium receives blood from the veins and pumps it to the right ventricle. Heart | Definition of Heart by Merriam-Webster At the heart of that waterfront redevelopment project is the new V&A Dundee, Scotland's first design museum and the only V&A Museum outside of London. Human Heart: Anatomy, Function & Facts - Live Science A heart attack is distinct from cardiac arrest, which is a sudden loss of heart function that usually occurs as a result of electrical disturbances of the heart rhythm. A heart attack can lead to cardiac arrest, but the latter can also be caused by other problems, he said.

3 Ways to Make the Heart Symbol Using a Computer - wikiHow In Windows, you can insert a heart symbol (♥) using a special Alt code with your numeric pad. If your computer doesn't have a numeric pad, you can use the Character Map. In macOS, you'll need to open the Symbol Viewer to find and insert the heart symbol.

Heart - Wikipedia The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. Blood provides the body with oxygen and nutrients, as well as assists in the removal of metabolic wastes. In humans, the heart is located between the lungs, in the middle compartment of the chest. Human Heart - Diagram and Anatomy of the Heart The heart wall is made of 3 layers: epicardium, myocardium and endocardium. Epicardium. The epicardium is the outermost layer of the heart wall and is just another name for the visceral layer of the pericardium. Thus, the epicardium is a thin layer of serous membrane that helps to lubricate and protect the outside of the heart.

How the Heart Works & Pumps Blood Through The Human Body The heart is an amazing organ. It pumps oxygen and nutrient-rich blood throughout your body to sustain life. This fist-sized powerhouse beats (expands and contracts) 100,000 times per day, pumping. Art With a Heart - Enhancing the lives of people in need ... Learn about Art With A Heart, our goals and our programs. Your Heart & Circulatory System - KidsHealth The heart has a left ventricle and a right ventricle. Their job is to squirt out the blood to the body and lungs. Running down the middle of the heart is a thick wall of muscle called the septum (say: SEP-tum).
